## Create job

## Automated workflows for textile printing pre-press

With SPGPrints **bestFLOW** software, you boost your entire job preparation – from design to engraving. The software automates all essential actions and ensures a seamless, process-driven workflow.

### **bestFLOW** enables

- Individually configurable workflows
- Fully automated engraving job creation
- Automated transfer to the engraving machine from design to engraving file
- Permanent knowledge preservation

### BENEFITS **bestFLOW**

- **Time and cost savings**

automated processes speed up job preparation, reduce manual work to ensure a higher productivity

- **Process reliability**

standardized workflows minimize sources of error and ensure reproducible results

- **Knowledge preservation**

**bestFLOW** permanently preserves process knowledge (database), even with personnel changes

- **Sustainable process documentation**

all relevant process information is centrally and permanently available
